ABOUT ME

MI NOMBRE ES PAULA LARA

My journey as an autodidact began early in my life, shaped by homeschooling from the age of 6. Starting my formal education as a developer and networking specialist, my fascination with arts and design led me to specialize in UI/UX design. Continually driven by curiosity, I've expanded my skills in graphic and product design, methodologies, app and web development, photography, animation, and illustration, blending both digital and traditional techniques.

Renowned for my active and inquisitive mind, I possess a strong aptitude for learning. My passion for design is deeply rooted in aesthetics, geometric precision, and a keen eye for color theory. With a relentless attention to detail, I draw inspiration from the nuances of everyday life. I approach my work with fervor, finding joy in both collaborating with my team and embracing constructive feedback as a means of growth.
